

Draft1

Fabrizio Fiorini

2/3/2021

This would be the Header

And this would be the sub-header

This is an R Markdown document where I will run some tests for the Assignment 1. Let's start with the basis.

Test of Italic

Test of Bold

Test:

- this
- is
- a list

This is the website where I got my dataset for the assignment: [kaggle](#)

Now I will test 3 different way of dealing with R codes

```
m <- matrix(1:6, nrow=2, ncol=3)
print(m)
```

```
##      [,1] [,2] [,3]
## [1,]    1    3    5
## [2,]    2    4    6
```

end1

```
m <- matrix(1:6, nrow=2, ncol=3)
print(m)
```

end2

```
##      [,1] [,2] [,3]
## [1,]    1    3    5
## [2,]    2    4    6
```

end3

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
## Min.   : 4.0    Min.   :  2.00
## 1st Qu.:12.0    1st Qu.: 26.00
## Median :15.0    Median : 36.00
## Mean   :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
## Max.   :25.0    Max.   :120.00
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
